THERMO-TRANSFER MATERIALS

DIGITAL MATERIALS FOR PRINT AND CUT

 *Made in Italy* 

OUR FACTORIES

SO.L.TER. has been active on the market since 1990.

The production of artefacts is currently carried out in our historic headquarters placed in Busto Arsizio, in our Skinplast factory placed in Basiano and in the new Legnano factory.

The products are largely made of polyurethane, using extrusion technologies, coatings with solvents, coating high solid solvent free and water-based coating.

With the Skinplast division, we are now able to operate also with PVC coating using green plasticizers.

We operate with four different divisions to meet the specialized needs of different markets.

75% of our products are exported to all continents.

Long-standing experience of our technical department is at your disposal to study the best solution to fulfill your projects requirements.

Our highly flexible organization can satisfy large and small production always meeting quality level, delivery time and specific demands.

Do not hesitate to ask for information on our different productions.

LEADER IN THERMO-TRANSFER MATERIALS

THERMO-TRANSFER FILMS FOR PRINT AND CUT

With Solvent, Ecosolvent, Latex and UV plotters

THERMO-TRANSFER FILMS FOR CLOTHING PERSONALIZATION

Color heat transfer films

THERMO-TRANSFER FOR LASER AND INK-JET WATER-BASED PRINTING

Suitable for the photographic industry, promotional and amateur

LEADER IN POLYURETHANE FILMS, SHEET AND TECHNICAL COATED FABRICS

EXTRUSION OF FILMS AND FOILS FOR MEDICAL FIELD, FOOD INDUSTRY, SPORT&SAFETY

TPU polyether and polyester various thicknesses starting from 100 microns up to 5 mm

MONO AND BI-COATED OR MULTILAYER FABRICS FOR NAUTICAL, MARINE FIELD, FOOD INDUSTRY, SPORT&SAFETY

Hot and high frequency weldable nylon or polyester

LEADER IN PVC/TPU COATED MATERIALS FOR BINDING AND PACKAGING

PRODUCTION OF NOBILITY PAPER

With quality PVC coating and extruded TPU coating

PRODUCTS

For the bookbinding, publishing and packaging sector

MATERIALS FOR WALL DECORATION FIELDS

Digital Affresco, Digital Graffiti and Digital Parati

REALIZATION

Of special coating with different thickness and embossing

LEADER IN PRINTABLE ECO-LEATHER MATERIALS

PRINTABLE LEATHER

With Solvent, Ecosolvent, Latex and UV plotters

SURFACE

100% polyurethane with special coating

REALIZATION

Of special coatings with different thickness and embossing

OUR SERVICES

For big productions we offer digital service with our HP LATEX 3500

FAST WORK

DIGITAL INVITE LIGHT

For application on cotton and polyester.
WITH SLIGHTLY ADHESIVE CARRIER.

DIGITAL INVITE LIGHT is our TOP MATERIAL. It is mixed PU/COPES film, 90 microns thickness on a slightly adhesive polyester support. It allows you to print and cut small details and gives also the opportunity to re-attach small parts before heat-transferring onto cotton and polyester fabrics through the use of our clear special application tape. In case of bigger prints, we suggest to use our yellow application tape. This material is recommended for easy and speed cutting and peeling. **RECOMMENDED FOR FAST WORKS AND LARGE PRODUCTIONS!**

COLOURS MIGRATION BLOCKING

DIGITAL
SUBLISTOP

For application on polyester dyed and sublimated fabrics.
WITH ADHESIVE CARRIER.

DIGITAL SUBLISTOP is one of our pu/copes materials with a particular stratification. Its thickness is 140µm. The Material is recommended for application on polyester dyed and s ublimated fabrics. The particular sublistop layer prevents the sublimatic migration of the color throughout the fabric, protecting the white transfer.
100% THE BEST ONTO THE MARKET!!!

DIGITAL
EXTRA WHITE

For application on cotton, polyester and nylon.
WITH SLIGHTLY ADHESIVE CARRIER.

DIGITAL EXTRA WHITE belongs to our family of 100% PU thin materials for the solvent, ecosolvent and Latex printing industry. It is only 70 microns and it is available in two versions: **MATT** and **GLOSS**. It is supported by a slightly adhesive polyester film to get a stable peeling. With its special thermoadhesive, suited for the application of all kinds of fabrics (cotton, polyester and nylon), the material allows the realization of big Logos and Images, if taken with our special Yellow Application Tape (for images till 50cm).

DIGITAL
EXTRA CLEAR

For application on cotton, polyester and nylon.
NON ADHESIVE POLYESTER.

DIGITAL EXTRA CLEAR is 100% PU transparent film. SUPER-MATT, MATT and GLOSS are the three versions available on non adhesive polyester. The material is recommended only for clear fabrics, made of cotton, polyester and nylon. Mirror print and cut. Very thin, soft and elastic article, only 45 microns thickness, washable at max 60°C.

DIGITAL INVITE

**For application on cotton and polyester.
WITH ADHESIVE CARRIER.**

DIGITAL INVITE is a mixed PVC/PU matt effect material. The thickness is 160 microns on a polyester adhesive. Notwithstanding the thickness, the Material is really soft and the application on cotton and heavy worked polyester fabrics is recommended. This material is particular for its OPTIC WHITE. It has a good resistance to washings. In cases of big logos or images, it is possible to withdraw the material by hand. The Print of big numbers is also recommended.

TEAM SOLUTION KIT

DIGITAL INVITE 120

**For application on cotton and polyester.
WITH ADHESIVE CARRIER.**

DIGITAL INVITE 120 is a mixed PVC/PU matt effect material. The thickness is 120 microns on a polyester adhesive. This material is very soft and recommended for nylon fabrics and others. This material has been developed for its adaptability to any type of fabrics. We suggest to use it, for example, to customize different clothing or accessories of different fabrics, from cotton, polyester and nylon. Doing so, you will use just a single material to customize your kit.

OUR MOST BREATHABLE MATERIAL

SCREEN PRINT DARK

For application on cotton and polyester.
WITH ADHESIVE CARRIER.

SCREEN PRINT DARK is our material, whose aim is the one of imitating the **screen-print effect**. This Material is really smooth and we suggest to use it for medium images. The tickness is 55 microns and it needs to be heat-pressed onto dark fabrics and has a **breathable effect**.

TRANSFER PAPER EFFECT

SCREEN PRINT CLEAR

For application on cotton and polyester.
ON PAPER WITHOUT ADHESIVE.

SCREEN PRINT CLEAR is our new material, whose final aspect should be the one of the **screen printing industry**. Great smoothness of the material. The best results are gained when used onto clear fabrics; but you can also get good results on pastel colours fabrics. The material is mirror printing and needs to be cut with use of scissors.

MIRROR PRINTING

D-GEL

For application on cotton, polyester and nylon.
WITH ADHESIVE CARRIER.

D-GEL is our new digital printing - foam material for solvent, ecosolvent and latex machines, that gives your logos originality and uniqueness. Thanks to a new technology, developed in our laboratories, D-Gel is a unique product on the market. The peculiarity of this material is its soft tree-dimensional effect. After the heat-press, the material becomes around 10% thinner, keeping its soft 3D effect.

D-PATCH

For application on cotton, polyester and nylon.
WITH ADHESIVE CARRIER.

D-PATCH is a product whose characteristics are same as D-GEL but with a leather soft touch.

TO BE SAFE

DIGITAL REFLEX

For application on cotton and polyester.
WITH ADHESIVE CARRIER.

DIGITAL REFLEX is a solvent and ecosolvent material made up of metallized micro-beads having extremely high refraction power. The material allows quadricromia clothing personalizations, producing high visible prints if directly lighted. We suggest to do a double print passage to get brilliant colour.

ACCESSORIES AND WORKING SUPPORT

APPLICATION TAPE

APPLICATION TAPE is our self adhesive material on enbosses plastic protection. We recommend the application with a spatula and the transferring with pneumatic press. The tape can be used more than one time because the surface doesn't melt unto heat-presses. Our application tapes are recommended for the withdraw and application of our digital materials.

PROTECT YOUR PRINTS

WASH RESIN

WASH RESIN can increase the material resistance to frequent washings above all where it is necessary, example in the field of the working clothing.

This special coating is simple and has an easy application after printing.

YOU CAN IRON DIRECTLY ON IT.

DIGITAL MATERIALS - OPERATING MANUAL

PRINT AND CUT WITH SOLVENT, ECOSOLVENT, LATEX AND UV PLOTTERS

WEED THE EXCESS MATERIAL

WITHDRAW THE PRINT WITH OUR APPLICATION TAPE (WE SUGGEST TO INSIDE THE PRINT OUT)

PLACE THE GRAPHIC ON THE T-SHIRT, HEAT-PRESS IT AND AFTER REMOVE THE POLYESTER CARRIER

PLS NOTE. The following technical data are the result of our laboratory studies. We suggest, anyway, to do small trials before starting with production. We also suggest not to stock the materials in moist or high temperature rooms. Our materials could have improvements through time.
